

Driving an Allis Chalmers WD tractor in your youth is the spark that starts the fire and passion for learning history, saving and collecting potential projects, cleaning, refurbishing and restoring those projects, and of course sharing the finished project with others who share the interest in AC.

After many years of collecting projects and parts, I have decided it is time for a reduction of the projects. The projects include tractors, combines, power units, graders, crawlers, lawn tractors, snow throwers, plows, disc plows, balers, drills, rakes, sprayers, corn pickers, silage blowers, cultivators, planters, mowers, and forage harvester. These potential projects are located in Eastern South Dakota.

Of course, one needs parts available to complete the desired projects. I have a fair selection of parts. WC, WD, WD45, C, CA, and B parts are more prevalent in my collection, however, I do have parts for other AC tractors and implements also.

Pictures are available for all items. Send an email and reference the item number for each implement you would like pictures for to the following address: Allisprojects@outlook.com
